Frontend developer with strong knowledge in building scalable web applications using modern technologies. I emphasize attention to detail in product development and excel at sharing knowledge and working in a team, contributing to a collaborative and productive environment.

## Experience

### Red Mascotera – Solidarity Project

Remote • november 2023 – may 2024

- Web application for viewing lost or adoptable pets using profiles and maps.
- Designed and developed the user interface with TailwindCSS and Next.js with TypeScript and OpenStreetMap.
- Participated in the deployment cycle using Docker, significantly improving web deployment times.

### Instituto Web – Experiencia IT

Remote • august 2023 – october 2023

- Web application for a fictional clinical laboratory system using React, featuring a homepage and a section for managing appointments and patients.
- Responsible for building data entry forms using react-hook-form and integrating the frontend with the backend through an API developed by another team.
- Implemented the SCRUM methodology and used Slack for efficient communication with other teams.

## Education

### Escuela de Innovación ITBA - Full Stack Developer Certification

Remote • august 2023 – november 2023

- Layout and design of a home banking platform, task management, team and weekly meeting coordination, project structure organization, research, and contributions to meet product requirements, as well as web deployment.
- React, NextJS, Python, SQLite, Django, django-rest-framework, Github, Slack

### Liceo Cultural Británico - First Certificate English B2

In-person • march 2017 – december 2024

- Writing in various text formats, fluent communication, reading and comprehension of texts and research documents, discussion, and presentation of ideas in groups.
