Software developer and Computer Engineering student (UBA) with solid knowledge of Google Cloud (GCP) and Gemini/Antigravity. I have practical experience developing team projects and a strong foundation in **backend** and **frontend** development (**Go**, **Python**, **Next.js**, **Docker**). I stand out for my analytical ability to solve complex problems and am looking to join a technical team where I can add value from day one and continue to grow professionally.

EXPERIENCE

Homebanking Web

Web application with frontend and backend using **Next.js**, **Python** with **FastAPI**, and **SQLite** as the database, implementing a login system with authentication and authorization using **JWT**.

WhatsApp and Instagram Chat History

Web application that reads personal chats exported from WhatsApp and Instagram in JSON format. It allows filtering, viewing, and navigating through dates using a dynamic calendar, built with **Next.js** and **Go**.

Pokemon Dashboard

Web application for viewing, creating, and editing entities/Pokémon, developed in **JavaScript** using the **SvelteKit** framework, **Tailwind**, **Python**, and a **SQLite** database. Large-scale **CSV** file data processing using **Bash** as the scripting language.
